

ARNAB CHAUDHURI

Kolkata, India | technofries1209@gmail.com | [Github](#) | [LinkedIn](#)

Backend Developer | GenAI, Agentic AI, Machine Learning | Passionate Problem Solver

SUMMARY

Results-driven developer with expertise in Full-Stack Development, Machine Learning, Deep Learning, and Data Science. Skilled in Python, JavaScript, React, Django, FastAPI, SQL, and modern AI technologies. Experienced in building scalable web applications, intelligent automation systems, predictive models, and data-driven solutions. Passionate about leveraging software engineering, artificial intelligence, and analytics to solve complex real-world problems and deliver impactful digital products.

PROJECT EXPERIENCE

Proctora-AI powered Multi-Modal Biometric Proctoring System(Hackathon Winning Project).

- Real-time AI-based biometric proctoring using FaceNet, ECAPA-TDNN, Python, OpenCV, SpeechBrain, and ChromaDB achieving >96% accuracy.
- Multi-factor identity verification through facial recognition and speaker recognition.
- Automated anomaly detection and continuous exam monitoring with live risk assessment.
- Secure embedding management and similarity-based authentication using vector databases.

Travel Group Recommendation System

- Built a full-stack travel planning platform using Django, React, PostgreSQL, and JWT authentication.
 - Developed an NLP-based recommendation system using TextBlob for sentiment analysis and destination prediction from user-generated travel preferences.
 - Implemented scalable REST APIs, group preference aggregation, and data-driven recommendation algorithms for collaborative travel decision-making.
-

EDUCATION

Bachelor of Technology in Information Technology

Aug 2024-July 2028

Netaji Subhash Engineering College
YGPA(Till date): 8.05

High School

Jan 2012- June 2024

B.D.M International School
Aggregate in XII Standard: 80.50%
Aggregate in Xth Standard: 95.5%

ADDITIONAL INFORMATION

- **Technical Skills:**
 - Programming Language: Python, C , JavaScript, Java , Go
 - Frameworks: Django, FastAPI, SpringBoot, Flask
 - Libraries: Numpy ,Pandas ,SciPy ,Matplotlib ,Seaborn , ReactJs , ScikitLearn, Celery, Tensorflow , PyTorch
 - Database: Postgresql , MongoDB, SqlLite
